

MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS

REPORT FOR:

MONTH

YEAR

February

2002

SIGNATURE

Michael Decker

In Charge of HSA

TO: Hydrometeorological Information Center, W/OH2
NOAA / National Weather Service
1325 East West Highway, Room 7230
Silver Spring, MD 20910-3283

DATE

March 8, 2002

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).

☒ No flood stages were reached in this HSA for the month above.

The San Angelo HSA had a dry but normal month of February for rainfall. Most of the rain fell on two days...the 4th and 5th...as widespread showers produced 3/4 inch to 1 1/2 inches of rain. The rest of the rain fell on the 19th...as scattered thunderstorms produced 1/4 to 1 inches... mainly east of a Haskell to Abilene to San Angelo to Sonora line. Rivers are near base flow...and the threat of river flooding remains low.

The San Angelo Regional Airport received 1.10 inches of rain for February, 0.08 inches below normal. For the year, San Angelo has had 1.42 inches, or 0.57 inches below normal. Abilene received 1.16 inches, 0.03 inches above normal for the month. For the year, Abilene has received 1.63 inches, or 0.47 inches below normal.
